# PUTTING FLAGLER ON THE MAP

**THE CENTER FOR GLOBAL EDUCATION:**  
Our Commitment to Boldly Engaging the World

# A WORLD of Opportunity

What if we could bring the Flagler classroom to the world? What if we could transform our campus into a hub of cross-cultural exchange, research, and foreign language acquisition?

The Center for Global Education envisions a campus environment where global engagement is an integral component to the Flagler College experience. It reimagines the meaning of campus community, boldly extending the College's academic reach beyond local and national borders while building a globally inclusive campus for students and educators at home.

"In all of my years of schooling, studying abroad has been the most impactful experience yet. As a result of researching development in Tanzania, my perspective has completely shifted. I now feel better equipped to continue my career in international business, and am excited to refocus my studies toward a more global approach."
